Harnessing The Power Of Nature

# ROOTSURE

## SUPERIOR NUTRITIONAL EFFICIENCY

**A simple and effective solution to establishing a healthy root system, ensuring optimal plant growth through metabolite based nutrition**

Rootsure is a revolutionary solution designed to prepare root systems for metabolic based nutrition. Rootsurre combines the powers of advanced biotechnology to establish the correct, biology driven biome around the roots.

- **Reduced input costs** - Improved nutritional efficiency by establishing a metabolic system, leads to lower inputs per kg of yield
- **Enhanced crop quality** - With optimal nutrient availability, crops treated with Rootsurre exhibit superior quality in terms of size, taste and nutritional value
- **Resilience to biotic and abiotic stresses** - Having an optimal biome around the roots, increases resilience to environmental stresses such as droughts as well as resilience to pests and diseases
- **Environmental Sustainability** - Rootsurre supports sustainable farming practices by reducing the dependency on synthetic chemicals

these factors translate into increased profitability

# Rootsure

establishes functional groups which are regulated by an endophyte. This lays the foundation for plant – soil communication ensuring plant regulated nutrient uptake

## INCREASED ROOT SIZE

The comparison to the left demonstrates increased root development on Rootsure treated maize vs. untreated
